

The new ALTO SMART 2000 represents state of the art technology manufactured by ALTO – the world leader in quality cleaning solutions who is dedicated to fulfilling customer needs.

The ALTO SMART 2000 is designed and manufactured using American Lincoln Technology. Quality, durability and reliable performance combined with innovative features and functional benefits will increase your productivity when cleaning.

Move ahead with ALTO's powerful ALTO SMART 2000

The SMART list:

- Maximum curb appeal
- Sweeps inside the frame - improving manoeuvrability
- Easy to adjust the broom
- Easy to empty and clean the hopper and tanks
- Wet sweep bypass
- Power steering with tilt wheel battery roll out
- Accu-Trol foot pedal
- Access to squeegee from the side for quick removal
- Dumps outside of the frame
- Pre clean dust baffles
- Excellent line of sight
- Constant brush pressure
- Powered dump function
- Balanced squeegee lift
- Hopper warning device
- Accessible front cover for servicing
- Easy scrub deck actuator removal
- Easy squeegee lift actuator
- Easy vac fan removal
- Easily accessible back flush
- Easy to replace squeegee
- Easy to use foot brake
- No tool dust filter removal

The ALTO SMART 2000 is a compact 2 in 1 cleaning machine that tackles both sweeping and scrubbing operations, with excellent manoeuvrability and unsurpassed water pick up even on the tightest turns.

Move ahead and achieve convincing performance through the advanced features available on the ALTO SMART 2000:

- Two in one cleaning (scrubbing and sweeping)
- Cleaning capacity of 8190 m²/h
- Optimum manoeuvrability in aisles up to 2.4 metres wide
- Sweeping and scrubbing function contained inside the frame with powered low dump design feature which enables more productive cleaning and dumping in confined spaces
- One pass cleaning – superior pick up ensures that floors are cleaned first time eliminating the need for another pass or another type of machine
- Large solution and recovery tanks enable longer scrubbing time between charging thus improving productivity
- SMART cart – battery roll out accessory which makes changing and loading batteries easier
- Tanks are easy to empty through drain hoses, reducing downtime and improving productivity
- Excellent driver ergonomics provides ease of operation, maximum comfort and reduced fatigue with simplified controls and the Accu-Trol system

ALTO SMART 2000

Powerful Moves on the Floor

ALTO®

Total Cleaning
Confidence™

AMERICAN-LINCOLN
TECHNOLOGY

ALTO introduces a powerful new performer

The ALTO SMART 2000 combination sweeper and scrubber dryer is manufactured to tackle the most difficult of cleaning tasks. It is packed with features – SMART and effective cleaning solutions which are encased by streamlined, ergonomic design, this compact design also gives excellent manoeuvrability making the ALTO SMART 2000 one of the best performers on the market.

Excellent driver ergonomics
Provides ease of operation, with dashboard and controls designed to increase comfort whilst reducing fatigue.

Roll-on, roll off battery
Makes servicing easy.

Accu-track squeegee system
A unique system that effectively removes liquids from the floor, and leaves no tell tale stripes, to go back and pick up.

Recovery tank:
Recovery tank is easy to clean and empty through a long drain hose and a clean out door

Easy brush:
Easy brush change with no requirements for tools

ALTO SMART 2000 Technical specifications

Sweeping path	mm (")	1170 (40") / 1170 (46")
Cleaning path	mm (")	1016 (40") / 1170 (46")
Coverage	m ² /h	7112 (40") / 8190 (46")
Hopper capacity	l	71
Vacuum motor, 3-stage	kW	2 x 0.55
Brush speed	rpm	200
Solution tank	l	208
Recovery tank	l	208
Power source		Battery, 36V

SMART cart:
SMART cart ensures easy roll out of batteries

Operator controls:
Easy to reach all operator controls

Simple to drain and clean

The ALTO SMART 2000 requires less down-time and makes cleaning time more productive

New compact design

Gives maximum manoeuvrability meaning that U-turns can be made in aisles of 2.4 metres

Sweep and scrub function is contained inside the frame

Allows more effective cleaning in narrow spaces and tighter turns

One pass pick-up

Gets floors clean first time, making a second pass unnecessary
